

Versatile system for

multiple needs

The ever increasing variety of products / SKUs to meet changing needs of your customer poses a tough challenge in terms of managing your material storage and handling.

Godrej Longspan Shelving is a perfect solution to it as it can store everything what you need to store from small components to heavy items, from short to long articles, from discrete to unitized items.

The versatility in its design allows configuring a span that optimizes your individual storage requirements. This creates maximum storage capacity from minimum space with 'Lost Space' kept to a minimum. Finally, it facilitates easy manual access to the items stored.
